

The consultants below were selected through a rigorous process and are highly experienced professionals with expertise in various topic areas and grant application processes. Most have an extensive background with federal grants, and some focus on foundation grants.

Even the most talented consultants, however, can only succeed when their skills, experience, and expertise match the needs of their clients. Your up-front due diligence to select the right consultant is a critical investment in the success of your grant proposal. We highly recommend that you establish a clear scope of work and utilize it to interview a minimum of three consultants to find the right match for your organization

Best wishes for successful projects that contribute to the quality and vigor of the Los Angeles area.
